Subject: Recommendation letter

To whom it may concern:

It is a great pleasure for me to recommend **Tumur Bazarragchaa**

I have known Tumur for more than two (2) years.

In 2014, our company TRACTEBEL Engineering (Engie group former GDF Suez) company was chosen as the general engineering consultant of the 315MW Egiin Goliin Hydro Power Plant project (EGHPP) of Ministry of Energy (Mongolia) to conduct the Feasibility study update to a bankable level.

During this time working with Tumur, he has led the Engineering department of the project implementation unit and has showed his leadership skills and diligent work ethics to complete the Feasibility study update within the time constraints. He is very precise and a deep thinker and quite innovative in finding solutions to new problems that he faces. In addition to his excellent academic capabilities, he has shown strong communication and social capabilities. I appreciate working with him as main contact person of the project unit.

Sincerely,

Olivier JULLIEN
Project Director
